

AirFit™ F20

## Fitting guide for AirFit F20

- 1
- Start by ensuring the magnets on the lower straps are unclipped.
  - If they are clipped, detach them by twisting and pulling them away from the frame.

- 2
- Hold the mask to the face, ensuring the top of the mask is aligned with the top of the nasal bridge.
  - Pull the headgear over the head, making sure the logo is facing outward.

- 3
- Position the lower straps so they both sit below the ears.
  - Bring each of the magnets up to meet their corresponding clips on the frame.

- 4
- Adjust the fastening tabs on the upper straps until the mask feels even and stable.
  - Reattach the fastening tabs.

- 5
- Repeat step 4 with the lower straps.
  - Reattach the fastening tabs.

- 6
- Connect the device's air tube to the elbow, then click the elbow into the front of the mask.
  - Start the device.

### Additional options

For patients with longer hair, we recommend feeding their hair through the back of the headgear. If tied in a pony tail, it should sit high enough to fit comfortably through the back of the headgear.

Refer to the user guide for further instructions and complete labeling information including indications, contraindications, warnings and precautions.

AirFit™ F20

## Easily fits them and everyone in between

Finding the right mask fit for a broad range of patients can be challenging. That's why we created the AirFit™ 20 series – masks that are specially-designed to fit all patients, regardless of facial profile. The AirFit F20 is designed to perform across a wide range of therapy pressures, and fit a remarkable 97% of patients in a recent international fitting study.<sup>1-3</sup>
